## Power Outage Tips

**Conserve water.** The park has a limited amount of water in a storage tank. This water comes to our homes by gravity. However, once we empty the tank electricity is required to refill the tank.

**To conserve body heat,** everyone should wear layers of clothing and a hat, and use blankets to keep warm. Moving around and staying active will also help to warm you up.

### Carbon Monoxide and Power Outages

If you lose power during the colder months, you may be tempted to use an unsafe heating source in your house. This should never be done as it is not only a fire hazard but can cause carbon monoxide poisoning which can be fatal.

**Use flash lights** in the dark, not candles.

**Keep refrigerator and freezer doors closed** as much as possible. An unopened refrigerator will keep foods cold for about 4 hours. A full freezer will keep the temperature for about 48 hours (24 hours if it is half full) if the door remains closed.
